

# DESY Seminar

10 April 2007, 17:00, DESY Hörsaal

Alexander Penin (Universität Karlsruhe)

## *Tabletop experiments vs large accelerators in hunting for new physics*

I argue that the small scale experiments can compete with high energy accelerators in search for new physical phenomena and in testing various theoretical models. The focus is on quantum electrodynamics.

- Tea and cookies will be served at 16:45 in the lobby.
- After the seminar there is a chance for private discussions with the speaker over wine and pretzels also in the lobby.
