

DESY Seminar

14 February 2006, 17:00, DESY Hörsaal

Peter Jenni
(CERN)

*The ATLAS Experiment Getting Ready for
LHC -
Exploring the High-Energy Frontier of
Particle Physics*

At CERN the Large Hadron Collider (LHC) project is well advanced. First proton-proton collisions at the high-energy frontier are expected for the second half of 2007. In parallel to the collider construction the powerful general-purpose ATLAS detector is being assembled in its underground cavern by a world-wide collaboration. ATLAS will explore new domains of particle physics. The status of LHC and ATLAS will be discussed, as well as the rich prospects for exciting new physics that are anticipated.

- Tea and cookies will be served at 16:45 in the lobby.
- After the seminar there is a chance for private discussions with the speaker over wine and pretzels also in the lobby.
