

DESY Seminar

14 November 2006, 17:00, DESY Hörsaal

Günther Dissertori
(ETH Zürich)

*Prospects for measurements of hard
scattering processes at the LHC*

After a brief report on the status of the LHC preparations (machine and detectors) I will try to summarize the current understanding of how well specific hard scattering processes can be measured at the LHC, and what the relevance of these measurements is. Examples are the Drell-Yan process, top production, W/Z + jet as well as inclusive jet production.

- Tea and cookies will be served at 16:45 in the lobby.
- After the seminar there is a chance for private discussions with the speaker over wine and pretzels also in the lobby.
