*Forward physics with proton taggers
at 420m at the LHC.*

We review the theoretical and experimental motivations behind recent proposals to add forward proton tagging detectors at 420m from the IP to the LHC experiments as a means to search for new physics.

- Tea and cookies will be served at 16:45 in the lobby.
- After the seminar there is a chance for private discussions with the speaker over wine and pretzels also in the lobby.
