

DESY Seminar

21 February 2006, 17:00, DESY Hörsaal

Gerrit Schierholz (DESY)

Nucleon Structure from Lattice QCD

The goal is to compute nucleon structure functions from first principles to obtain a quantitative understanding of the underlying dynamics of quarks and gluons. In this talk I shall review the present status of lattice calculations.

- Tea and cookies will be served at 16:45 in the lobby.
- After the seminar there is a chance for private discussions with the speaker over wine and pretzels also in the lobby.
