

DESY Seminar

25 October, 17:00, DESY Hörsaal

Tian Yu Cao
(Dept. of Philosophy, Boston University)

*Murray Gell-Mann's hesitant breakthrough
in the formulation of QCD*

The interplay between theoretical deliberations and experiments that led to the final breakthrough in the formulation of a consistent gauge theory of the strong interactions will be reviewed and critically assessed.

- Tea and cookies will be served at 16:45 in the lobby.
- After the seminar there is a chance for private discussions with the speaker over wine and pretzels also in the lobby.
