

# Post shutdown plans

- \* There is a general consensus that, in part due to the uncertainties w.r.t. HERA-B running this year (request for 8 week dedicated run not granted), we will not have sufficient expert manpower to run after the shutdown therefore we will concentrate on analysis.
- \* Nonetheless, we leave the option open – until May – for continuation after the shutdown to allow for a possible renewal of the collaboration (the feasibility of renewal is still under discussion).
