

1st Joint Symposium University Kyoto&Hamburg

Goal of our meeting:

- create and/or foster new collaborations
- both Universities cover a very broad spectrum
- focus here: theoretical particle-, astroparticle-physics and cosmology

Hamburg 'speciality': several theory locations

- here in this building: string and phenomenology
- other side of this site: astroparticle physics
- other side of the city: Observatory Bergedorf

**In addition: experimental groups of particle physics, WIMPs
and detector R&D at University Hamburg and DESY**

1st Joint Symposium University Kyoto&Hamburg

1st Joint Symposium University Kyoto&Hamburg

Theoretical and
experimental
cosmological
observatory !

very special
attractive place:
often booked for
weddings!

Now let's start:

→ *thanks a lot to Prof. Marcus Brüggen (Theory Division of the Observatory)*
