

# Pressemitteilung

Durch unsere Arbeit in internationalen Forschungseinrichtungen pflegen wir seit langem gute Beziehungen zu unseren KollegInnen aus unterschiedlichen Ländern. mehr noch war es immer ein sehr positiver und wichtiger Aspekt in unserer Arbeit, dass wir unabhängig von politischen Grenzen und Ideologien zusammen arbeiten konnten.

Seit Frühjahr 2014 wurde Wissenschaftlern aus den USA davon abgeraten, bei wissenschaftlichen Konferenzen in Russland teilzunehmen und noch mehr, Wissenschaftler aus Russland, die bereits seit mehr als 20 Jahren Mitglied in experimentellen Kollaborationen sind, wurden von Besuchen in den USA eingeladen. Selbst Studenten, die an einer gemeinsamen Sommerschule von CERN (Genf, Schweiz) und Fermilab (Chicago, USA) teilnehmen wollten, wurden abgewiesen:

*“ ... We have been informed by the U. S. Department of Energy that visits to Fermilab by Russian citizens from non-U.S. institutions are restricted. This means that until this ban is lifted, your participation in the Symposium is not allowed. At present, we do not have any further information on plans to suspend this directive in the near future. ... ”*

Solche Reisebeschränkungen behindern erheblich unsere wissenschaftliche Arbeit und widersprechen dem Geist von internationalem wissenschaftlichem Austausch. Wir sind fest davon überzeugt, dass internationale wissenschaftliche Zusammenarbeit ein wichtiger Beitrag ist, Spannungen zwischen unterschiedlichen politischen Systemen zu reduzieren.

Wir haben daher eine Unterschriftenkampagne gestartet um gegen diese unbegründeten und gegen den wissenschaftlichen Geist gerichteten Beschränkungen zu protestieren: nach nur zwei Wochen haben mehr als 700 KollegInnen die Petition unterstützt und unterschrieben ([link zur Petition](#)).

Wir haben diese Petition mitsamt Unterschriften an die Direktoren der grossen internationalen Forschungseinrichtungen CERN (Schweiz), DESY (Deutschland), Fermilab und SLAC (USA) überreicht und sie aufgefordert, alles mögliche zu tun, um den internationalen wissenschaftlichen Austausch frei von außenpolitischen Beziehungen zwischen Staaten zu halten, im Interesse der Wissenschaft und dem Frieden.

M. Dittmar, S. Grancagnolo, H. Jung, J-P. Merlo, F. Spano  
(Organisatoren der Petition, unterstützt vom conCERNed Club, CERN)

Kontakt: H. Jung ([hannes.jung@desy.de](mailto:hannes.jung@desy.de))

Anhang:

- Petitionstext (Original englisch, deutsche Übersetzung)
- Unterschriftenliste
- Zusammensetzung der Unterzeichner nach Ländern

Open letter to the governments of the relevant countries and to particle physics laboratories, scientific organizations

Call to keep international scientific exchange out of foreign policy relations of states, in the interest of science and for peace!

International exchange and collaboration has been, for many years, a major pillar of international research in particle physics. CERN is celebrating 60 years of science for peace in 2014. Even during the cold war international collaboration and exchange proved to be possible, and the collaboration of scientists between Eastern and Western countries was an important factor for the success of e.g. LEP and the LHC (CERN, Switzerland), the HERA accelerator (DESY, Germany) as well as the research at the colliders at Fermilab and Stanford (USA).

During spring 2014, as a consequence of the conflict in Ukraine, scientists from the US were discouraged to participate at scientific conferences in Russia and even worse, scientists from Russia, who have been members of experimental collaborations for more than 20 years, were de-invited for visits in the US.

Scientific discussions and exchange are vital for science and in particular for particle physics. Scientific exchange without borders and ideologies is an essential and important path towards a peaceful world. Cutting scientific exchange is a step in escalation of international conflicts.

We call on the sense of responsibility of our governments and representatives in science organizations and committees to keep international scientific exchange out of foreign policy relations of states, in the interest of science and peace.

We call on the sense of responsibility of our scientific communities, scientific directors and our colleague researchers to do everything possible to come back to a situation, which does not hinder international scientific research and education.

We call on the responsibility of funding agencies to support strongly scientific exchange without borders.

Offener Brief an die Regierungen der jeweiligen Länder und Teilchenphysik Institute,  
wissenschaftliche Organisationen

## Aufruf den internationalen wissenschaftlichen Austausch von außenpolitischen Beziehungen von Staaten frei zu halten, im Interesse der Wissenschaft und für den Frieden !

Internationaler Austausch und Zusammenarbeit ist seit vielen Jahren ein wichtiger Pfeiler der internationalen Forschung in der Teilchenphysik. CERN feiert „60 Jahre Wissenschaft für den Frieden“ im Jahr 2014. Auch während des Kalten Krieges ist internationale Zusammenarbeit und Austausch möglich gewesen, die Zusammenarbeit von Wissenschaftlern zwischen Ost und West war ein wichtiger Faktor für den Erfolg von z.B. LEP und LHC (CERN, Schweiz), HERA (DESY, Deutschland), sowie der Forschung an den Beschleunigern am Fermilab und Stanford (USA).

Im Frühjahr 2014, als Folge des Konflikts in der Ukraine, wurde Wissenschaftlern aus den USA davon abgeraten, bei wissenschaftlichen Konferenzen in Russland teilzunehmen und noch mehr, Wissenschaftler aus Russland, die bereits seit mehr als 20 Jahren Mitglied in experimentellen Kollaborationen sind, wurden von Besuchen in den USA ausgeladen.

Wissenschaftliche Diskussionen und internationale Zusammenarbeit sind wichtig für die Wissenschaft und insbesondere für die Teilchenphysik. Wissenschaftlicher Austausch ohne Grenzen und Ideologien ist ein wesentlicher und wichtiger Weg in eine friedliche Welt. Einschnitte in wissenschaftlichen Austausch sind ein Schritt zur Eskalation internationaler Konflikte.

Wir appellieren an das Verantwortungsbewusstsein unserer Regierungen und Vertreter in Wissenschaftsorganisationen und Ausschüssen, den internationalen wissenschaftlichen Austausch frei von außenpolitischen Beziehungen zwischen Staaten zu halten, im Interesse der Wissenschaft und dem Frieden.

Wir appellieren auch an das Verantwortungsbewusstsein unserer wissenschaftlichen Gemeinschaft, wissenschaftlichen Direktoren und unserer Kollegen, alles zu tun, um zu einer Situation zurück zukehren, welche internationale wissenschaftliche Forschung und Ausbildung nicht behindert.

Wir appellieren an die Verantwortung der Geldgeber wissenschaftlichen Austausch ohne Grenzen bewusst zu unterstützen.
