Subject: Re: GDE meeting at Frascati: Session on work done since
Snowmass by working and global groups

Dear Gerry,

what is a reason that GG6 was not informed and not invited to this meeting (as it is devoted to progress of works in groups)? Physics Options significantly influence ILC design, we have no representative in GDE and it is difficult influence the project design and keep under control how our recommendation are taken into account by other groups. Some of them are just ignored. There is also some problem of organization character which need consultations with GDE.

Best regards

Valery
