

# SUMMER STUDENTS.

DESY International Summer Student Programme  
21 July to 10 September 2026

© DESY 2025

DESY is one of the world's leading research centres for photon science, particle and astroparticle physics, as well as accelerator physics.

Each summer DESY invites up to 100 students in physics and related disciplines to join research groups and participate in their activities. The summer student programme consists of individual research projects and complementary lectures.

#### **Application deadline is 31 January 2026**

Qualified applicants should have completed three years of full-time studies at university level by summer 2026. All participants will receive financial support.

#### **Photon Science**

Projects are offered at DESY as well as EuXFEL and include research with synchrotrons, FELs, and optical lasers on molecules, soft matter, solid-state and nanomaterials, the development of new experimental techniques, the theory of light-matter interaction, and scientific computing.

#### **Elementary Particle, Astroparticle and Accelerator Physics**

Projects center around the experiments in elementary particle physics (ATLAS, CMS, BELLE II, ALPS II, and future experiments), astroparticle physics (CTAO, IceCube, RNO-G, HESS, ULTRASAT, and the Einstein Telescope), development of novel particle accelerators and detectors, particle physics theory, and scientific computing within the Worldwide LHC Computing Grid.
