

HERA Week 28. Januar ... 4. Februar 2003

28. Jan:
New phasing of
e-RF stations

30. Jan:
Feedback Phasing

29. Jan:
Clystron WR defect -> e beam loss
Polwender CX299 def. -> p beam loss at

1. Feb:
Ground Fault
Dipole ... ?

3. Feb:
Access for
HERMES & ZEUS

3. Feb:
New Orbits
established,
e-beam steering
and background
tuning

- * ... routine procedures for injection and ramping
- * background tuning sometimes not that easy !!!
- * beam currents: $I_p=13...19\text{mA}$
 $I_e=18...33\text{ mA}$
