

Handing over to any recipient in a non-EU country

Such shipment (export) must be carried out under customs control.

This can only be carried out by V413 together with a forwarding company that has a branch office in Germany or owns a partner either of which can issue an NCTS-T1 document.

It is not mandatory for this forwarding company to be commissioned by or paid by DESY.

For this reason, transport using vehicles owned by DESY or by private individuals is not possible

To avoid unnecessary delays, please follow the instructions in paragraph 3 of the Completion of Formalities sheet.

When using packaging made of wood or with wood content, be sure to observe the “pest-free” regulations. New packaging provided by ZM4 or V413 or by other commissioned external companies are normally already marked accordingly.
